

Data Centers Are Booming—and Reshaping Risk for Designers and Contractors

By **Jack Baschwitz*** | **David J. Hatem, PC** | **Dillon Aisenberg**

August 20, 2026

In an article for *Building Design+Construction*, MG+M Partner [David Hatem](#) and Associates [Dillon Aisenberg](#) and [Jack Baschwitz](#) examine the risks facing designers and contractors as data center development accelerates across the United States.

The authors discuss challenges including evolving technology, compressed schedules, shifting project requirements, and significant business interruption exposure. They also outline contract strategies to manage these risks, including clear performance obligations, change-control procedures, and mutual waivers of consequential damages.
